

Cookie Policy

On the site <http://www.basilianihotel.com> ("Site") we use cookies to make it work properly and improve the quality of the web navigation. This document gives the users detailed information on cookies and on how it is possible to manage them.

What are Cookies?

Cookies are small text files sent from the website to the terminal (usually the browser), where they are stored before being retransmitted to the same sites on the same user following visit. During your browsing experience you may receive cookies from different sites or web servers (third parties), which may contain elements present on the site you are visiting (such as images, maps, sounds, specific links to other web pages).

Cookies are used for different purposes, such as authentication procedures, storing information about specific configurations and so on.

Cookies used on the site <http://www.basilianihotel.com/>

Technical Cookies

They are necessary to show specific parts of the website correctly. They can be of two different categories:

- **persistent cookies**: after closing the browser they remain active for a limited pre-defined period of time
- **session cookies**: they remain active only for the duration of the session

These cookies are sent only by our domain and are necessary to show the Site correctly. Depending on the technical services offered, they will always be used, unless the user modifies the browser settings (by doing this web pages may not be shown correctly)

Analytical Cookies

These cookies enable us to collect information on the web use. We may use this information for anonymised statistical analyses or to improve the site performance. They gather anonymised information on the user surfing experience. They are sent by the Site or by third party domains. They may be considered as technical cookies if used directly by the site to collect supplementary and anonymised information.

This Site do not use (and do not allow third parties to use) Google analysis tools to monitor and gather personal information that may identify the user. In any case, if this will be made possible in the future, we will carry out the IP anonymization in Analytics, so that it won't be possible for Google to associate the IP address to any other data or to associate an IP address to the user's identity.

The owner of the Site, Malve s.r.l, uses only the following technical cookies (that remain active only for the duration of the session in order to keep the user session open):

- Session Cookies
 - ID
 - JSESSIONID

Third party cookies

Our Site do not use third parties cookies

How to disable cookies changing your browser cookies settings

Most browser (Internet Explorers, Firefox, Chrome, etc) are configured to accept cookies. Anyway it is possible to control or disable cookies by modifying the browser settings. This may compromise the site performance and/or limit the services offered. Third party cookies disabling do not affect the site performance.

To disable cookies on Google Chrome

1. Open the Browser Chrome
2. Click 'Menu' in the browser toolbar next to the 'url' window
3. Select 'Settings'
4. Click 'Show Advanced Settings'
5. In the section 'Privacy', click 'Content Settings'
6. In the section "Cookies" it is possible to modify the following settings concerning cookies:
 - allow data saving on the local drive
 - modify local data only until the browser is closed
